

## **Enrichment Lessons for your Maths Top Sets in Years 10/11**

- **created and given by sixth-form mathematicians**
- **challenging and fun extensions to the GCSE syllabus**
- **will inspire your year 10/11 to take Maths Further**

Alyce Merry (previously Further Mathematics Network Somerset Manager and now a Further Mathematics Support Programme Associate) has been helping sixth-formers at Richard Huish College in Taunton produce creative, stimulating and enjoyable lessons suitable for your Maths top sets in years 10/11.

The sixth-formers have **volunteered** to do this activity and are really keen to engage with your budding mathematicians, and will be very happy to talk to them about what A-level Maths and Further Maths are like, and what to do with these A-levels after college or school. They have created lessons that are off the GCSE syllabus, but are not too challenging and will signpost some A-level Maths.

Please contact Alyce directly ([alycemerry@furthermaths.org.uk](mailto:alycemerry@furthermaths.org.uk)) to book the sixth-formers. They will visit your school to give their lesson within your normal timetable and in a normal classroom, or you could combine two or more classes. The visits are **free**.

**Please contact Alyce if your sixth-formers would be interested in volunteering for this activity in the future.**
