

GeoGebra for A level Maths

with Dr Kurt Baker

Wednesday 6th July 2011 3:00pm to 6:00pm

at Bournemouth and Poole College, Lansdowne, Bournemouth, BH1 5JJ

GeoGebra is a FREE educational geometry Java-based software package. It is quick to learn and very powerful as it can be used by teachers and students alike.

This hands-on training session is appropriate for all teachers of A level Core Maths. The session will take you through the basics of using GeoGebra and give you the start you need to design your own resources to enhance your A level and GCSE teaching.

These sessions will be led by Kurt Baker, an experienced teacher of A level Mathematics and Further Mathematics.

Attendees will also receive a pack of ready-made GeoGebra modules demonstrating key topics from A level Maths which can be used immediately in the classroom.

The fee for this event is £90 (or £45 for teachers in FMSP-registered schools/colleges), to include resources and light refreshments. To book places, contact Jo Sibley (details below) by Wednesday 22nd June.

(No deposit will be required but payment will become due on the day of the course for all places booked, so please contact Jo by Wednesday 22nd June if you wish to cancel. Please let Jo know to whom the invoice should be sent if you wish to be invoiced for the cost. Purchase order numbers are also acceptable. Cheques should be made payable to 'Poole Grammar School Further Maths account'.)
