

Live Online Professional Development in Mathematics

*A range of courses to enable teachers to teach A level Mathematics,
A level Further Mathematics with confidence.*

A modern approach to professional development; rather than attending a one or two day course, delegates meet weekly for live, interactive online sessions with a tutor and a small group of teachers.

These courses focus on developing subject knowledge and discussing approaches to teaching.

How does the live online tutoring work?

We use a web-based facility which is easy to use and allows a tutor and delegates to communicate live online using audio, handwriting on a shared virtual whiteboard and instant messaging via the internet.

- Shared whiteboard
- Instant messaging
- Audio conferencing
- Application sharing

What you need to participate

- A broadband internet connection
- A recent version of Java (free to download)
- A headset or earphones for communication

Spring 2012 – Coursework for MEI C3
Cost £30

Deadline for applications: Friday 27th January 2012
